

**【Product Name】**

Mild Cognitive Impairment Training Software

**【Product Introduction】**

The product is based on Cognitive Remediation Therapy (CRT) technology, guided by the theory of synaptic plasticity, neural network plasticity, functional reorganisation and functional brain area transfer, and utilizes computer as a carrier to conduct intelligent and adaptive personalised cognitive assessment and training. It aims to enhance cognitive function in patients with cognitive impairments and delay the decline of cognitive abilities. It is suitable for the auxiliary treatment of mild cognitive impairment.
