

【Product Name】

Abdominal Aortic Stent Graft System

【Product Introduction】

The product consists of a pre-assembled Stent Graft and a delivery system. The Stent Graft is available in body, bifurcated, sleeve, and integrated. The bare stent is made of nickel-titanium alloy, and the stent and radiopaque markers are sewn onto a polyester covering using non-absorbable sutures. It is sterilized with ethylene oxide and is disposable after using. It is suitable for endovascular treatment of abdominal aortic aneurysm.
