

**【Product Name】**

Collagen Patch Dressing

**【Product Introduction】**

Lidian® Collagen Patch Dressing consists of a collagen solution and a nonwoven fabric. It has undergone extremely strict product technology review and follows stricter product technology quality standards, characterized by good tissue compatibility and hypoallergenicity. The product is sterile, preservative-free and thickener-free, pure, safe and reliable. This product is the first Class III medical device incubated by Healtech CDMO Center based on the whole process of “Marketing Authorization Solution”, and it is the world’s first new product that applies extracellular matrix (ECM), a new medical material, to medical aesthetics on a large scale and in an industrialized manner.
